

PATENT COOPERATION TREATY

From the
INTERNATIONAL PRELIMINARY EXAMINING AUTHORITY

PCT

NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(PCT Rule 71.1)

To:

COLE, Paul Gilbert
Lucas & Co.
135 Westhall Road
Warlingham
Surrey CR6 9HJ
GRANDE BRETAGNE

Date of mailing
(day/month/year)

24.11.2005

Applicant's or agent's file reference
MDX,017-PCT

IMPORTANT NOTIFICATION

International application No.
PCT/GB2005/050043

International filing date (day/month/year)
24.03.2005

Priority date (day/month/year)
30.03.2004

Applicant
MIDDLESEX SILVER CO. LIMITED et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

PCT/GB2005/050043

Re Item V.

- 1) Reference is made to the following documents:
D1 : EP 0 492 487 A (DODUCO GMBH + CO DR. EUGEN DUERRWAECHTER) 1 July 1992 (1992-07-01)
D2 : US 3 503 883 A (IAN ALASTAIR MONCRIEFF FORD ET AL) 31 March 1970 (1970-03-31)
D3 : GB 1 070 383 A (J. GODDARD & SONS LIMITED) 1 June 1967 (1967-06-01)
D4 : GB 1 217 414 A (J. GODDARD & SONS LIMITED) 31 December 1970 (1970-12-31)
D5 : US 3 248 235 A (PRYOR DONALD M ET AL) 26 April 1966 (1966-04-26)
- 2) Document D1 (see column 3, line 18 -column 5 ,line 40, claims and examples) discloses an aqueous tarnish-inhibiting composition for silver which comprises an alkyl mercaptan (eg a C16 thiol) inhibitor and surface active components. The surface active components may comprise a mixture of a non-ionic and anionic surfactants. The pH of the composition is 1-10.
 - 2.1) Document D2 (see column 2, line 67 to column 3, line 52, claims and examples 2 and 7) discloses aqueous tarnish inhibiting compositions containing dialkyl disulfides. The compositions may contain detergents and be used as polishing paste or non-ionic emulsifiers and be used as dips.
 - 2.2) Document D3 (see claims and example 7) discloses protective polishing and cleaning compositions for silver. The compositions may contain alkyl thioglycollates and non-ionic surfactants.
 - 2.3) Document D4 (see page 1, line 85 to page 2, line 49, claims and examples) discloses a polishing and tarnish removing aqueous dip for silver containing an acid, thiourea, a non-ionic surfactant and an alkyl thiol.
 - 2.4) Document D5 (see column 3, lines 26-33, claims and examples) discloses an anti-tarnish composition for copper-containing surfaces. The compositions typically contained alkyl mercaptans, sodium chloride, a non-ionic surfactant, citric acid and

optionally an abrasive.

- 3) The present composition (see claims 1-34) is novel (Article 33(2) PCT) since the composition contains a specific combination of a non-ionic, anionic and zwitterionic surfactants. The use (claims 35) is novel since it employs this composition.
- 3.1) The problem solved by the present compositions is the provision of aqueous anti-tamishing compositions which are able to uniformly disperse the treatment agent and remain stable for long periods of time.

The application (see examples) contains indications that treatment compositions with the presently claimed combination of surfactants are particularly stable. Thus the problem is solved.

The cited prior art contains no suggestion that particular combinations of surfactants would solve this problem and thus an inventive step (Article 33(3) PCT) can be recognised. The use is inventive since the composition used is inventive.

CLAIMS

1. A water-based composition for treating a metal, comprising a treatment agent selected from an alkanethiol, alkyl thioglycollate, dialkyl sulfide or dialkyl disulfide, and in concentrations effective to solubilize said treatment agent:

a non-ionic relatively hydrophobic surfactant which is a compound of the formula

- wherein R_1 represents C_{10} - C_{24} alkyl or alkenyl, m is 0 or 1 and n is 1 or 2, or which is ethoxylated fatty acid monoglyceride;

an anionic surfactant; and

a zwitterionic surfactant selected from betaine surfactants, imidazoline-based surfactants, aminoalkanoate surfactants and iminodialkanoate surfacts.

2. The composition of claim 1, wherein the treatment agent is hexadecyl or octadecyl mercaptan.

3. The composition of claim 1 or 2, wherein the non-ionic relatively hydrophobic surfactant comprises cocamide DEA.

4. The composition of claim 1, wherein the non-ionic relatively hydrophobic surfactant comprises an ethoxylated fatty acid monoglyceride of the formula:

wherein R_1 represents C_{10} - C_{24} alkyl or alkenyl.

5. The composition of claim 4, wherein the surfactant is a compound in which R1 represents C₁₂-C₁₈ alkyl or alkenyl.
- 5 6. The composition of claim 5, wherein the surfactant is glycereth-2-cocotate.
7. The composition of any preceding claim, comprising 0.5-10 wt % of the relatively hydrophobic surfactant.
- 10 8. The composition of any preceding claim, comprising 1-6 wt % of the relatively hydrophobic surfactant.
9. The composition of any preceding claim, comprising 2-5 wt % of the relatively hydrophobic surfactant.
- 15 10. The composition of any preceding claim, further comprising a polyol.
11. The composition of claim 10, comprising 0.5-10 wt % of the polyol.
- 20 12. The composition of claim 10, comprising 1-8 wt % of the polyol.
13. The composition of claim 10, comprising 1-5 wt % of the polyol.
14. The composition of any of claims 10-13, wherein the polyol is glycerol.
- 25 15. The composition of any preceding claim, wherein the anionic surfactant is of the formula RO-(CH₂CH₂)_nSO₃M wherein R represents C₁₀-C₁₈ alkyl, n is 2-6 and M represents a monovalent cation.
- 30 16. The composition of claim 15, wherein the anionic surfactant is a monovalent cation salt of laureth sulfate.

17. The composition of any preceding claim, wherein the amount of anionic surfactant (solids) is 0.1-15 wt%.

18. The composition of claim 17, wherein the amount of anionic surfactant (solids) is 0.3-10 wt%.

19. The composition of claim 17, wherein the amount of anionic surfactant (solids) is 0.5-1 wt%.

20. The composition of any preceding claim, wherein the zwitterionic surfactant is cocamidopropyl betaine.

21. The composition of any preceding claim, wherein the zwitterionic surfactant is present in an amount of 0.3-6 wt%

22. The composition of claim 21, wherein the zwitterionic surfactant is present in an amount of 0.6-3 wt%.

23. The composition of claim 21, wherein the zwitterionic surfactant is present in an amount of 0.9-1.5 wt%.

24. A composition according to any preceding claim comprising treatment agent in an amount of 0.1-5 wt%

25. A composition according to claim 24 comprising treatment agent in an amount of 0.5-2 wt%.

26. A composition according to claim 24, comprising treatment agent in an amount of about 1 wt%.

27. A composition according to any preceding claim, further comprising a salt of a strong base with a strong mineral acid.

28. The composition of claim 27, wherein the salt is sodium chloride or sodium sulfate.

5 29. The composition of claim 27 or 28, comprising 0.1-3 wt% of said salt.

30. The composition of claim 27 or 28, comprising 0.5-2 wt% of said salt.

31. The composition of claim 27 or 28, comprising about 1 wt% of said salt.

10

32. The composition of any preceding claim, which is a polishing dip and further comprises an acid and a thiourea.

15 33. The composition of any of claims 1-31, which is a cream or paste polish further comprising a solid polishing medium.

34. The composition of claim 33, wherein the polishing medium is precipitated chalk, infusorial earth, silica or γ -alumina.

20 35. Use of the composition of any of claims 1-34 for the treatment of a silver-copper alloy, a silver-copper-germanium alloy, copper, brass or nickel.
